
Point Events - A good place to start 5S

The foundation of work space productivity starts with first 2 S's of the 5S process.

- S1 will remove items that cause waste in the workspace
- S2 will place the needed items in their most efficient location

Use point events to jump start the 5S effort within an individual work stations or office cubicles. This type of point event should take 2-4 hours. It should involve

- one person who works in the area,
- one person to help sort and set
- A team leader to facilitate the S1 and S2 process discipline and assure the event is driving work space productivity.

At all costs avoid sloppy execution this type of 5S point event or it will lead participants to treat 5S as Housekeeping.
